Subject Index to Volume 24

A

Acquired behavior, brain neuron gene expression in organization of 127
Affect-behavioral system (ABS)
reciprocal neuropsychological unconditional-conditional 143
subsystems of 143
Arrythmogenesis, myocardial ischemic effect on during aversive conditioning 65
Artificial reflexes, Boldyrev's experiment on 35
Associative processes, derailments of 138
Atropine
and differential heart responses to conditional food stimuli 156
effect on conditioning 11
Auditory association cortex-tonotopic examination, evidence of 63
Auditory cortex, mapping of 50
Auditory frequency-shifts, effects of on zero and below-zero SCR habituation 98
Auditory parakoniocortex, function of 50, 63
Aversive conditioning, myocardial ischemic effect during 65

B

Babkin, B.P., research of 35
Behavior
brain neuron gene expression in organization of 127
brainstem-generated 63
definition of 8
hemispheric asymmetry and variability in 43
stress ulcer and 54
Behavioral trait, transmission of through genetic selection 71
Below-zero habituation (BZH), auditory frequency-shift effects on 98
Bilateral electrodermal activity, sex differences and 150
Biofeedback, in manipulating QT interval in ECG 65, 102
Boldyrev, V.N., research of 35
Brain
digestive system and 71
hemispheric asymmetry in and behavioral variability 43
Brain neuron gene expression, in organization of innate and acquired behaviors 127
Brainstem, behavior generated by 63
Bruxism, sleep posture and 70

C

Character, definition of 6
Clinical progressive relaxation, biomedical consequences of 70
Color discrimination, Orbeli's experimental work in dogs on 133
Conditional cardiovascular response
myocardial ischemic effect on during aversive conditioning 65
parasympathetic denervation of SA node effect on 66
Conditional reflexes
differentiation of, discovery of in Pavlov's laboratories 35
shortened 81
Conditional stimuli, food, differential heart responses to 156
Conditioning
in sensorimotor cortex neurons, pharmacological analysis of 11
using microprocessor based workstation 68
Consciousness, definition of 6
Control question test (CQT) polygraph, uncovering sources of subjectivity in 69
Cortical stimulation, auditory association cortex-tonotopic evidence from 63
Cortical-stimulation-evoked perception, of tones 50
Covert speech behavior
electromyographic measurement of 27
patterns of 19
Creative intuition, definition of 6
Cyclic adenosine monophosphate, stroke-prone changes in with stress 66

D

Differentiation, discovery of in Pavlov's laboratories 35
Digestive system, Pavlov's neurological investigations of 71
DNA synthesis activation, peptides in 127
Dogs, color discrimination in 133

E

Education, definition of 6
Electrocardiography
manipulating QT interval in by biofeedback 65
manipulating QT interval in by cognitive effort 102
Electrodermal asymmetry 150
Electroencephalography, broad spectral, Fourier analysis of from fluctuation point of view 90
Electromyography, frequency analysis of in covert speech behavior measurement 27
Emotions
definition of 6
reciprocal unconditional-conditional organization of 68, 143
Event-related potential, in post-traumatic stress disorder 64
Extinction, discovery of in Pavlov's laboratories 35
Eye movement, imagery and 58

Brain
digestive system and 71
hemispheric asymmetry in and behavioral variability 43
Brain neuron gene expression, in organization of innate and acquired behaviors 127
Brainstem, behavior generated by 63
Bruxism, sleep posture and 70

C

Character, definition of 6
Clinical progressive relaxation, biomedical consequences of 70
Color discrimination, Orbeli's experimental work in dogs on 133
Conditional cardiovascular response
myocardial ischemic effect on during aversive conditioning 65
parasympathetic denervation of SA node effect on 66
Conditional reflexes
differentiation of, discovery of in Pavlov's laboratories 35
shortened 81
Conditional stimuli, food, differential heart responses to 156
Conditioning
in sensorimotor cortex neurons, pharmacological analysis of 11
using microprocessor based workstation 68
Consciousness, definition of 6
Control question test (CQT) polygraph, uncovering sources of subjectivity in 69
Cortical stimulation, auditory association cortex-tonotopic evidence from 63
Cortical-stimulation-evoked perception, of tones 50
Covert speech behavior
electromyographic measurement of 27
patterns of 19
Creative intuition, definition of 6
Cyclic adenosine monophosphate, stroke-prone changes in with stress 66

D

Differentiation, discovery of in Pavlov's laboratories 35
Digestive system, Pavlov's neurological investigations of 71
DNA synthesis activation, peptides in 127
Dogs, color discrimination in 133

E

Education, definition of 6
Electrocardiography
manipulating QT interval in by biofeedback 65
manipulating QT interval in by cognitive effort 102
Electrodermal asymmetry 150
Electroencephalography, broad spectral, Fourier analysis of from fluctuation point of view 90
Electromyography, frequency analysis of in covert speech behavior measurement 27
Emotions
definition of 6
reciprocal unconditional-conditional organization of 68, 143
Event-related potential, in post-traumatic stress disorder 64
Extinction, discovery of in Pavlov's laboratories 35
Eye movement, imagery and 58

F

Food stimuli, atropine and differential
heart responses to 156
Fourier analysis, of broad spectral EEG
from fluctuation point of view 90
Freedom of choice, definition of 6
Frequency analysis, of covert speech
behavior measurement 27

G

Gamma-aminobutyric acid (GABA), effect
on conditioning 11
Gene expression, peptides in regulation of 127
Generalization, discovery of in Pavlov's
laboratories 35
Genetic selection, cotransmission of
behavioral and neurochemical trait through 71
Genomes, role of in learning 127

H

Heart rate, in post-traumatic stress
disorder 64
Heart rate power spectrum
parasympathetic denervation of SA node
effect on 66
stability of signature over time 65
Heart responses, atropine and
differential to food stimuli 156
Hemispheric asymmetry, role for in human
behavioral variability 43
Homeokinetic stability, systems study of 69
Hypertension, stress ulcers and 54

I

Imagery, psychophysiological components of 58
Imipramine, binding of to platelets 71
Information processing
CNV and 70
McGuigan's neuromuscular model of 58
Inhibiting-facilitating relations,
disorganization of in schizophrenia 138
Innate behavior, brain neuron gene
expression in organization of 127
Insulin blood glucose, stroke-prone
changes in with stress 66
Interdisciplinary dictionary 6

K

Kashereninova, N.A., research of 35
Kupalov, P.S., concept of shortened
conditional reflexes of 81

L

Lateral specialization, behavioral
variability and 43
Learning
regulatory peptides in 127
utility of Pavlovian conditioning in study of 133

M

McGuigan's neuromuscular model of
information processing 58
Microprocessor based workstation, in
Pavlovian conditioning 68
Motivation
definition of 6
reinforcement and 6
Myocardial ischemia, effect of on
conditional cardiovascular response
and arrhythmogenesis 65

N

Need
definition of 6
phylogenetic prehistory of 6
Nervism 71
Nervous activity, higher 6
Neurochemical trait, transmission of
through genetic selection 71
North American CQT polygraph, uncovering
sources of subjectivity in 69

O

Oligopeptides, role of in learning 127
Orbeli, L.A., color discrimination in
dogs experiments of 133

P

Paraadaptive personality reactions
compensatory 143
overdetermined 143
reciprocal unconditional-conditional
organization of 68, 143
Parasympathetic denervation, of
sinoatrial node 66
Pavlov, Ivan P.
discovery of concepts of conditioning
in laboratories of 35
Gantt's work with 1
mental and physical descriptions of 1
political position of 1
views of on health 1
views of on religion 1

Pavlovian conditioning, using microprocessor based workstation 68
Peptides, role of in learned behavior 127
Personality, definition of 6
Personality reactions, paraadaptive 143
reciprocal unconditional-conditional organization of 68
Personality types, clinical progressive relaxation and 70
Pharmacological agents, in conditioning in sensorimotor cortex neurons 11
Phasic states, in analysis of thought dissociation in schizophrenia 68, 138
Phonetic coding, patterns of 19
Platelet imipramine binding, dissociation with serotonin uptake in boys 71
Polygraph, subjectivity of control question test in 69
Post-traumatic stress disorder event-related potential correlated of 64
heart rate changes in 64
Progressive relaxation, biomedical consequences of 70
Psychological concepts, definitions of 6

Q

QT interval
manipulating by cognitive effort 102
manipulating in ECG by biofeedback 65

R

Reciprocal unconditional-conditional organization, of emotions and para-adaptive personality reactions 68
Reinforcement
definition of 6
discovery of in Pavlov's laboratories 35
in motivation 6
Relaxation, clinical progressive, biomedical consequences of 70
Reticular perturbations 63

S

Schizophrenia, analysis of thought dissociation in on basis of Wedensky-Pavlov phasic states 68, 138
SCR. *See* Shortened conditional reflexes
Secretion, discovery of 71
Semantic processing, covert speech behavior and 19
Sensorimotor cortex neurons, pharmacological analysis of conditioning in 11
Sensory experimentation, utility of Pavlovian conditioning in 133
Serotonin uptake, dissociation with platelet imipramine binding in boys 71
Sex differences, bilateral electrodermal activity and 150
Shortened conditional reflexes
blocking and UR diminution in 67
concept of 81
effects of auditory frequency-shifts on zero and below-zero habituation of 98
psychophysiological and psychopharmacological implications of 81
Sleep posture, and sleep-related bruxism 70
Soul, definition of 6
Speech behavior, covert 19
electromyographic measurement of 27
Speech musculature, interaction of with linguistic regions of brain 19
Stress
in spontaneously hypertensive rats 66
ulcers from with open-field behavior of Wistar rats and 54
Subconsciousness, definition of 6
Superconsciousness, definition of 6
Systems study, of visceral orienting reflexes as indices of homeokinetic stability 69

T

Temperament, definition of 6
Thought dissociation, analysis of in schizophrenia, on basis of Wedensky-Pavlov phasic states 68, 138
Tolochinov, I.F., research of 35
Tones, cortical-stimulation-evoked perception of 50
Tonotypic cortical representation 50

U

Ulcers, stress-induced in spontaneously hypertensive rats 54
Ultraparadoxical phase, in thought dissociation in schizophrenia 138
Unconditional response, diminution of in SCR conditioning 67

V

Visceral orienting reflexes, as indices of homeokinetic stability 69
Vul'fson, S.G., research of 35

W

Wedensky-Pavlov phasic states, in analysis of thought dissociation in schizophrenia 68, 138
Will, definition of 6

Z

Zero habituation, auditory frequency-shift effects on 98

Contributors to Volume 24

A

Andy, Orlando J. 50

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 12, 1970: Section 3685. Title 39 United States Code) Date of Filing—October 1, 1989, Title of Publication—PAVLOVIAN JOURNAL OF BIOLOGICAL SCIENCES; Frequency of Issue—Quarterly; Annual Subscription Price—$75.00; Location of Known Office of Publication—Downsville Pike, Rt. 3, Box 20-B, Hagerstown, MD 21740; Location of Headquarters or General Business Offices of the Publisher—East Washington Square, Philadelphia, PA 19105; Publisher—J. B. Lippincott Company, East Washington Square, Philadelphia, PA 19105; Editor—F. J. McGuigan, Ph.D., United States International University, 10455 Pomerado Road, San Diego, California 92131; Managing Editor—Lisa Marshall, East Washington Square, Philadelphia, PA 19105; Owner—J. B. Lippincott Company, East Washington Square, Philadelphia, PA 19105; Known Bondholders, Mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities—Harper & Row Publishers, Inc., 10 East 53rd Street, New York, NY 10022. A. Total no. copies printed (*net press run*), average 500, actual 500; B. Paid circulation 1. Sales through dealers and carriers, street vendors and counter sales, average none, actual none; 2. Mail subscriptions, average 370, actual 361; C. Total paid circulation, average 370, average 361; D. Free distribution by mail, carrier or other means. Samples complimentary, and other free copies, average 27, actual 43; E. Total distribution (*sum of C and D*), average 397, actual 404; F. Copies not distributed 1. Office use, leftover, unaccounted, spoiled after printing, average 103, actual 96, 2. Returns from news agents, none; G. Total (*sum of E & F—should equal net press run shown in A*), average 500, actual 500. I certify that the statements made by me above are correct and complete. Kevin Fenton, *Circulation Manager*.
